

GUIDE TO SEDATION DENTISTRY

Everything You Need to Know to Make an
Educated Decision for Your Sedation Dentistry

Welcome and Congratulations!

Dear Friend,

My name is **Dr. Oleg Klempner**, and right off the bat, I want to congratulate you on making the wise decision that'll help change your life forever! By requesting a copy of our Sedation Dentistry Guide.

My ultimate goal is simple: to give patients smiles that they love. Why? Because in my years of practice, I've found that there's almost nothing that can make as big a difference in your health, self-confidence, and overall quality of life as your smile.

Everything else can be working like clockwork – job situation, family, friends and relationships. But if you can't experience the simple act of savoring the foods you love most or if you're embarrassed to smile or even engage in conversation because of your teeth.

Then no matter how great everything else is going, the real joy you desire long for is missing.

I'm here to tell you that you don't have to settle for that kind of life any longer. I know this for a fact because I have seen countless individuals who used to suffer from poor teeth, crooked or large gaps in their teeth - now eating and enjoying the very foods they'd thought were lost to them forever and smiling like they never have before with confidence.

I've seen patients walk in my doors seemingly ashamed to smile, and later walk out those same doors glowing with a lovely smile as radiant as the sun.

Thanks to the miracles of modern medicine and technology it's now not only possible, it's far more affordable and achievable than you probably have ever imagined.

Whether you're reading this guide for yourself or for a loved one, you're in the right place. We've designed this to provide you with all the necessary information you need to make an educated decision regarding what is best for overall health and happiness.

With all that said, let's get started!

MEET YOUR DOCTOR

Dr. Oleg Klempner

Oleg Klempner, DDS, gives you and all of his patients at Diamond District Dental in New York City the kind of warm, personalized, state-of-the-art dental care that he would want himself. His goal is to help you achieve and maintain optimal dental health — and have fun doing it.

After receiving a bachelor's degree from New York University (NYU), Dr. Klempner earned his DDS at NYU's prestigious College of Dentistry in 1991. He completed his dental residency at Bryn Mawr Hospital in Pennsylvania in 1992 and has been in private practice ever since.

Dr. Klempner is a lifelong learner and innovator. He was one of the first private practice dentists in the United States to use cutting-edge technology, such as dental lasers, computer-assisted bite analysis, and 3D technology.

Since entering private practice, he has taken hundreds of hours of advanced education. His commitment to staying current on research and technologies allows him to provide you with the highest level of dental services possible.

His philosophy: "I take the needs of our patients very seriously, but I don't take myself very seriously."

What Our Patients Are Saying

 3 months ago

I went into their office with a dental disaster. I had missing teeth and other dental problems since childhood that were never adequately dealt with, and then had a partial bridge that had been in way, way too long and was causing serious problems, in addition to years of grinding that hadn't been dealt with because of the bridge. After the initial consult I almost had a heart attack when I realized the level of work that needed to be done, but that's the breaks. The staff at the office were just fantastic. They walked me through a lot of questions and a plan for a long-term fix of my mouth. Dr. Klempner was the kindest and most thoughtful dentist I've ever visited, and the other direct staff were similar to interact with. I was pretty terrified at various points, but after about 5 months of appointments (yup it was that bad, and they were each really concrete and clearly-intentioned appointments) I walked out of the office with the nicest smile I've had literally my entire life and plan to continue going there for annual check-ups etc etc.

 4 months ago

Dr. Klempner took the time to clearly explain my treatment plan and what I needed to do on my end to prevent further issues, something none of my previous dentists had ever done. He answers all questions and is very upfront about what you should expect.

The office is also immaculately clean, with state of the art equipment and friendly staff. I used to dread going to the dentist but they make it a little more manageable. 5/5 stars would recommend.

 a month ago

I went here for my initial visit and cleaning. Their office is conveniently located close to subway stations. The office is very clean and the staff is very friendly and professional. Everything went very smoothly all throughout. I didn't have to sit and wait. Dr. Klempner was very informative and had a way of explaining things that can be easily understood. Overall, it was a great experience. Very recommended!

 3 weeks ago **NEW**

Absolutely loved it here! I moved to NYC about a year ago, and I was going crazy trying to find a dentist I trusted. I had such a wonderful experience here and EVERYONE was so friendly and helpful. Everyone also is very intelligent and knowledgeable which was so nice because I had a few questions that were answered! :)

Overall I would 10/10 recommend this place to anyone!!!

What is Sedation Dentistry? What options do I have?

In conjunction with local anesthesia, Sedation Dentistry is the use of medication to relieve patients' pain and anxiety during dental procedures. Sedation Dentistry is a wonderful solution for anyone who has been putting off important dental procedures due to anxiety, fear of pain, around visiting the dentist.

1.

INHALED SEDATION

This usually comes in the form of what you might know as "laughing gas." With this type of sedation, you will be awake for the procedure, but feel completely relaxed.

2.

ORAL SEDATION

Oral sedation usually comes in the form of a pill that you take before the procedure. With this type of sedation, you might fall asleep during the procedure, but you can be easily awakened.

3.

IV SEDATION

This medication goes through an IV, and has the benefit of the dentist being able to easily adjust the level of sedation to provide you with maximum comfort. With IV sedation you will fall asleep, but can be easily awakened.

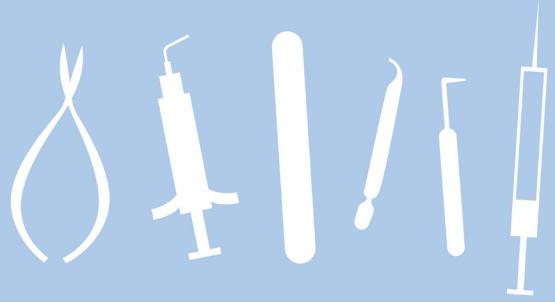

4.

DEEP SEDATION

This is very similar to IV Sedation because you will be completely unconscious, you cannot easily be awakened until the effects of the anesthesia wears off.

COMFORTABLE EXPERIENCE POSSIBLE.**

TOP 7 Misconceptions About Sedation Dentistry

Here's a list of the top 7 misconceptions we've heard from our patients when it comes to Sedation.

- 1. Sedation is Only for Major Procedures.** Sedation is NOT only for major medical procedures. If a procedure might cause you discomfort or anxiety of any kind, sedation is an option for you. If you would like to be sedated during your procedure, simply speak with us about it!
- 2. Sedation is Dangerous.** Sedation is a safe practice. Speak with your dentist about any pre-existing health conditions you might have. They will know how to find a solution that fits your situation.
- 3. All Sedation is the Same.** There are several different kinds of sedation that might be used in different situations, or for different procedures.
- 4. Sedation is Expensive.** Sedation can actually be very affordable. In some cases, it may even be covered by your insurance.
- 5. Sedation Can Last for a Full Day.** Typically, sedation does not last for very long. Depending on the dosage and type you are given. It'll last long enough that you'll have an enjoyable experience here at our office.
- 6. Sedation Requires a Painful Needle Prick.** Not all sedation requires a needle, it can be administered via a gas and sometimes it is given in pill form.
- 7. Sedation Only Helps with Pain & Anxiety.** Sedation is extremely helpful for patients with anxiety. But that's not the only benefit of using sedation! Sedation dentistry can also help with a bad gag reflex, low pain tolerance, sensitive teeth, restlessness and more!

COULD YOU BENEFIT FROM SEDATION DENTISTRY?

(Check All That Apply)

- I have a fear of the dentist.
- I have a low pain tolerance.
- I can't sit still in the dentist's chair.
- I have very sensitive teeth.
- I have a bad gag reflex.
- I will be getting extensive dental work.
- I can't stand the sound of the drill.

If you answered YES to any of the above,
Sedation Dentistry could be right for you!

The entire staff at diamond dental will treat you with the upmost respect and professionalism. I have gotten my dental work here for a number of years and drive about an hour each way to the office. Everyone working in the office seems to enjoy their job and it comes across in their work. Dr. Klempner is polite and patient and has always taken the time to explain things and give me a list of options. New office looks spectacular in a very convenient location for subway/train. Office offers an affordable Insurance plan for individuals with bad dental insurance. Thank you!

FREE NO STRINGS ATTACHED SEDATION GAME PLAN

Finally, together we will create a comprehensive step by step game plan to give you a smile that makes you feel confident, in an environment that makes you feel completely comfortable.

FREQUENTLY ASKED QUESTIONS

Q: "Are there side effects related to sedation?"

A: Some sedation procedures are so quick you do not have any side effects. With lengthy procedures you might experience dry mouth, dull headache, or grogginess for a short amount of time after the procedure.

Q: "How long will I be sedated for?"

A: Depending on the procedure you could be sedated for anywhere between 30 minutes to a few hours.

Q: "Is sedation dentistry safe?"

A: Yes! [Dr. Klempner] has been using sedation for many years and is a licensed professional.

Q: "Will I feel anything?"

A: You will not feel anything during the procedure. After the sedative wears off you might have a slight discomfort depending on the procedure.

Q: "What will I feel like on sedation?"

A: You will feel calm and sleepy for general sedation. For general anesthesia you will be asleep.

Q: "Can kids benefit from sedation dentistry?"

A: YES! Kids just like adults can benefit from sedation dentistry. When you meet with the Dentist just ask about what options he has for your children.
